A first impression

Immersed in the timeless tranquility of the Berici Hills, this new single turnkey villa represents an exclusive residential project designed for those who want a modern, efficient dwelling perfectly integrated into the landscape. The architecture, characterized by clean lines and essential volumes, dialogues harmoniously with the surrounding environment, giving a living experience where nature and comfort coexist in perfect balance.

On the ground floor is a large bright living area, with an open-plan kitchen and overlooks framing the green hills. Here every detail is designed to offer functionality and well-being: the windowed bathroom is complete with all amenities, while the space dedicated to the washer and dryer is designed for an orderly management of daily life. The single garage, equipped with an automated overhead door, completes the convenience of the main level.

The sleeping area, located on the upper level, is totally customizable according to the needs of those who will live there. You can opt for a three-bedroom, two-bathroom configuration, where the master suite has a private bathroom and large walk-in closet, or choose a four-bedroom, two-bathroom solution, ideal for large families or those who need additional space for smart working or personal hobbies.

The context in which the project is located is of great naturalistic value: we are located along the Salve Regina Trail, a protected path within the European LIFE+ Colli Berici Natura 2000 program. The villa will rise on a panoramic ridge overlooking the valley, offering open views and a constant relationship with the landscape. The feeling is that of living in a protected and private place, where light, privacy and nature become an essential part of everyday life.
